Introducing the 2026 Lucid Gravity Grand Touring: A Force of Attraction Like Nothing Else in Nature

April 15, 2025

The first SUV ever to deliver everything consumers want in a vehicle without compromise:

- The versatility of a full-size three-row luxury SUV, with space for adults and families to ride in comfort with all their gear.
- The performance and handling of a luxury sports car, with up to 828 hp, standard air suspension, and an available rear-axle steer system for superior maneuverability.
- Up to 450 miles of EPA-estimated driving range enabled by Lucid's next-generation proprietary EV tech – developed and manufactured in-house by Lucid.[1]
- One of the easiest and fastest possible charging experiences, allowing Plug & Charge convenience at superchargers with a built-in NACS charge port and nearly universal compatibility.
- Groundbreaking DC fast charging capable of adding 200 miles of range in less than 11 minutes.[2]
- Effortless, human-centric user experience with Lucid's intuitive UX 3.0 operating system, 34-inch 6K OLED touchscreen, and available augmented reality head-up display.

NEWARK, Calif., April 15, 2025 /PRNewswire/ -- **Lucid Group**, Inc. (NASDAQ: **LCID**), maker of the world's most advanced electric vehicles, today introduced the 2026 Lucid Gravity, the first and only SUV to deliver everything consumers want in a vehicle without compromise.

The Lucid Gravity offers the versatility of a sophisticated full-size three-row SUV, with space for adults and families to ride in comfort with all their gear and the performance of a luxury sports car. With up to 450 miles of EPA-estimated driving range, blistering-fast charging that can add 200 miles of range in less than 11 minutes, and a built-in NACS charge port, the Lucid Gravity ensures the easiest and fastest possible charging experience possible at any public charger.

"Lucid Gravity is the first SUV that truly compromises nothing," said Eric Bach, SVP Product at Lucid. "It reimagines what an SUV can be, offering an unprecedented combination of comfort and space, ride and handling, practicality and range, and with today's announcements, exceptional charging performance and convenience. With seating for up to seven full-size adults and space for their luggage, the Lucid Gravity truly is the ultimate vehicle for the whole family."

Versatility and comfort of a full-size three-row luxury SUV

The Lucid Gravity is designed around a spacious, flexible interior. The seating is spacious and accommodating, with the added convenience of second and available third-row seats that fold flat to reveal more than 111 cubic feet of total usable cargo space in the seven-passenger version for an effortless combination of comfort and cargo capacity. Five-passenger versions offer 120 cubic feet of cargo space. The sliding second row seats combine with available integrated convenience tables for an elevated back-seat experience. Remarkable legroom is carried through to the third row, enabling a comfortable seven-passenger configuration, making it the ideal vehicle for every adventure. Even with seven adults aboard, the Lucid Gravity offers more than 21 cubic feet of cargo space behind the third row of seats – enough for all of your gear and luggage.

Standard adjustable air suspension delivers a smooth, comfortable ride for passengers on any road – and even when the pavement ends and the trail begins. An optional towing package equips Lucid Gravity with a generous towing capability of up to 6,000 lbs.[3]

The performance and handling of a luxury sports car

Lucid Gravity's exceptional performance starts with a brand-new platform developed from the ground up as a sporty SUV. Featuring two motors, and all-wheel drive, the Lucid Gravity Grand Touring is rated at 828 hp, and accelerates from 0 to 60 mph in 3.4 seconds. Large new front and rear brake calipers co-developed with Brembo ensure confident stopping power.

Lucid's brand-hallmark handling is now even better with a rear-axle steering system, using an evolution of the same system found in one of Europe's best-known sports cars. It enhances both high-speed driving dynamics for exceptional handling on winding roads and makes day-to-day driving easier than ever by shortening the space needed for the vehicle to maneuver through tight city streets and crowded parking lots.

Universal charging: Next-level charging speed, easier than ever

"Lucid Gravity offers next-level fast charging speeds and seamless Plug & Charge access to the top charging networks including Tesla Superchargers and Electrify America," said Emad Dlala, SVP of Powertrain at Lucid. "To enable this experience for our customers, we developed new, unique technology to allow the 926V Lucid Gravity to charge seamlessly at up to 400 kW on 1000V charging equipment and at sustained speeds of up to 225 kW on 500V architecture fast chargers, including Tesla V3 Superchargers."

To enable superlative charging performance, Lucid developed and patented an innovative technology employing its proprietary rear motor drive unit to boost the charging voltage of 500V to match the 926V of the Lucid battery pack. Unlike the pack splitting solutions used by some competitors, this high-tech solution permits charging with the highest voltage that a charging station is capable of outputting and therefore enables the efficient utilization of electrical current and consequent reduction of cable heat. This novel technology allows full compatibility with 500V and 1000V charging networks, offering Lucid Gravity customers maximum charging speed on whatever charger is most accessible. At peak charging rates, the Lucid Gravity sustains a robust charging curve for longer, adding 200 miles in less than 11 minutes.

Effortless, human-centric user experience

The Lucid Gravity introduces the next evolution of Lucid's user interface, the Clearview Cockpit. It features an intuitive 34-inch curved and uninterrupted 6K OLED display that floats above Lucid Gravity's innovative new steering wheel, closely matched with the driver's line of sight, and a newly designed horizontally oriented Full HD Pilot Panel with quick-access touch bar. The optional augmented reality head-up display puts important information directly in the driver's line of sight to make it easier than ever to navigate and interact with the vehicle without the need to take one's eyes off the road.

It's all powered by Lucid UX 3.0, a new operating system that offers an intuitive, clear, and customizable interface for drivers and passengers alike. Combined with Lucid's powerful in-house over-the-air software update framework, the Lucid Gravity is a true software defined vehicle, designed with hardware capable of offering new features via over the air software updates, providing new features throughout the vehicle's lifetime.

Pricing and Availability

The 2026 Lucid Gravity Grand Touring is priced from $94,900 and is available to order now.[4] The Lucid Gravity Touring is priced from $79,900 and is planned for later in 2025.[4]

About Lucid Group

Lucid (NASDAQ: **LCID**) is a Silicon Valley-based technology company focused on creating the most advanced EVs in the world. The award-winning Lucid Air and new Lucid Gravity deliver best-in-class performance, sophisticated design, expansive interior space and leading energy efficiency. Lucid assembles both vehicles in its state-of-the-art, vertically integrated factory in Arizona. Through its industry-leading technology and innovations, Lucid is advancing the state-of-the-art of EV technology for the benefit of all.

Forward Looking Statements

This communication includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as "estimate," "plan," "project," "forecast," "intend," "will," "shall," "expect," "anticipate," "believe," "seek," "target," "continue," "could," "may," "might," "possible," "potential," "predict" or other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. These forward-looking statements include, but are not limited to, statements regarding plans and expectations with respect to the Lucid Gravity and its 2026 Grand Touring model, including the driving range, space and versatility, maneuverability and handling, specifications, features, configurations, capabilities, charging performance and compatibility, user interface and experience, and the promise of Lucid's technology. These statements are based on various assumptions, whether or not identified in this communication, and on the current expectations of Lucid's management. These forward-looking statements are not intended to serve as and must not be relied on by any investor as a guarantee, an assurance, or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and may differ from these forward-looking statements. Many actual events and circumstances are beyond the control of Lucid. These forward-looking statements are subject to a number of risks and uncertainties, including those factors discussed under the heading "Risk Factors" in Part I, Item 1A of Lucid's Annual Report on Form 10-K for the year ended December 31, 2024, as well as other documents Lucid has filed or will file with the Securities and Exchange Commission. If any of these risks materialize or Lucid's assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. There may be additional risks that Lucid currently does not know or that Lucid currently believes are immaterial that could also cause actual results to differ from those contained in the forward-looking statements. In addition, forward-looking statements reflect Lucid's expectations, plans or forecasts of future events and views as of the date of this communication. Lucid anticipates that subsequent events and developments will cause Lucid's assessments to change. However, while Lucid may elect to update these forward-looking statements at some point in the future, Lucid specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing Lucid's assessments as of any date subsequent to the date of this communication. Accordingly, undue reliance should not be placed upon the forward-looking statements.

[1] EPA-estimated driving range of 450 miles for Lucid Gravity Grand Touring equipped with 20" front /21" rear wheels and configured as 2-row, 5-seat vehicle. Range and battery power vary with temperature, driving habits, charging and battery condition and actual results will vary.

[2] When equipped with 20"F/21"R wheels, configured as a 2-row, 5-seat vehicle, and connected to a 400+ kW DC fast charger. Actual rates will vary based upon vehicle equipment and charging conditions.

[3] For Lucid Gravity Grand Touring when equipped with Towing Package. Cargo, interior weight, and vehicle equipment affect towing capacity.

[4] Prices applicable to U.S. market only. Excludes tax, title, license, options, destination and documentation fees. Vehicles shown images here equipped with optional features.
